LANGUAGES

Russian: native
English: intermediate

EDUCATION

2018: USPU, Russia Faculty of International Relations

2022: Ulearn, Software testing

2022: Yandex, Software testing

ABOUT ME

Junior testing specialist with strong soft skills and good technical base. I have extensive experience in a few IT industries. My career path started in HR, continued in IT analyst and now I'm looking for a job in the QA field.

At my previous job I worked as an IT analyst. I did many different tasks, including QA . In doing testing tasks, I realized that I enjoyed them the most. I decided to evolve in this area and took many QA courses. They gave me a solid theoretical basis and practical experience that I lacked in my previous role.
I realize that now I'm absolutely ready for the new challenges as a QA specialist.
My colleagues and team leads say I am a responsible, proactive and positive thinking person. And I will be happy to prove it again in your company.

By the way, I already know the difference between Agile & Waterfall, UI & UX, API & webhook, so my mentors won't need to spend their time explaining to me the basics :)

EXPERIENCE

IT Analyst | BeaversBrothers, web-studio

📅 April 2021 – January 2022   📍 Yekaterinburg, Russia

- Processing a project request and discussing it with developers
- Participation in the writing of technical specifications
- Verification of completed tasks for compliance with specifications
- Testing web pages on different devices
- Beta testing of the final products
- Getting customer experience feedback, passing it on to the developer and verifying that the final product meets the customer's requirements

HR bussines partner | SKB Kontur, IT company

📅 December 2018 – April 2021   📍 Yekaterinburg, Russia

- I was HRBP of the Business Intelligence Center
- Ran retrospectives
- Helped teams with HR duties
